Abstract: The consideration of sanctions imposed by NATO, the United States, the European Union, Britain and other states over Russia must be considered thoroughly, regardless of all the facts, evidence, factors, benefits of these sanctions for which countries.

Key words: War, Economy, Politics

1. Introduction

February 21 and the document 2022 we are witnessing the conduct of a specialized military operation in Russia on the territory of Ukraine. This article examines the sanctions imposed by the United States, NATO, the European Commission, Canada, Britain and other countries close to the United States on Russia in all areas of its life.

This article analyzes the advantages and disadvantages of sanctions against both the sanctioning parties and the annexed country Russia.

2. Research methods

Research methods, analysis of information on sanctions imposed by the United States, NATO, the European Union, the United Kingdom, Canada and other countries, the benefits of these sanctions for sanctioning countries, the harm to them, the benefits and harms of the sanctioned state - Russia.

3. US AND NATO PLANS FOR WAR AGAINST RUSSIA

3.1 The plan, which is a large-scale nuclear war against RUSSIA in order to destroy it, began in 2010 and the soil is being prepared in Ukraine mostly through SOROS NGOs.

The beginning is - The events in UKRAINE 2014 - THE BEGINNING

In Ukraine after 2014 there was a proven genocide of the Russian-speaking population in Ukraine and especially in the Donetsk and Luhansk regions, shelling of the population of Donetsk and Luhansk regions,

Closure of all opposition media, US training, NATO CIA on private Nazi military formations, Nazi battalions, Ban on speaking Russian in the media, Changing and changing the names of streets, squares and replacing them with Nazi names, Since 2014 anti-Russian training programs , incitement to hatred of Ruxia, praise of Nazism, constant parades and marches in honor of Nazism, Nazism is an official state ideology, open genocide of the Russian-speaking population, violations of basic human rights in Donetsk and Lugansk, indifference to the United States and Europe genocide of more than 4 million people in these two regions, life as the most human value is reduced to zero by the EUROPEAN UNION, USA, UK, complete indifference to the fate of the population in Donetsk and Lugansk, however since 2014 Kyiv has been invited many times to abide by the Minsk agreements, which he refuses.

It all started in 2014 when the United States and under the auspices of the Vice President of USA then Biden's son joins the board of directors of the company Burism with a salary of \$ 50,000 per month Contracts are being signed with American companies for shale gas extraction in the territories of Eastern Ukraine - ie Donetsk and Luhansk districts The population refused to emigrate from these territories and began the total genocide of the population of Donetsk and Rugansk which is predominantly Russian population. The Russians do not want to leave their native places. Then Ukrainian paramilitaries, Nazi formations trained by the CIA, NATO and the United States began burning children, cremating families, children, raping women, shelling with the CITY system, point U missiles, artillery tanks, phosphate and cell bombs, and children with flamethrowers. , women, Russian population is 17% of the total population of Ukraine.

3.2 The son of US President Joe Biden Hunter Biden, together with officials from the US Department of Defense's Threat Reduction Service and Pentagon subcontractors in Ukraine, has played an important role in creating a financial opportunity to work with pathogens in Ukraine. The United States has chosen Ukraine as a testing ground for testing the components of biological weapons and drugs, as Ukraine is closest to Russia. Ukraine borders with Russia. In these twelve organized, established, equipped biolabs on the territory of Ukraine, genetic material is collected mostly from Russians, so that the development of biological and chemical weapons should be used mostly against Russians with the relevant genetic material. The spread of biological weapons and chemical weapons must be through insects. An unmanned aerial vehicle for the spread of infected insects in the air is also patented in the United States. The patent description states that with this device, enemy troops can be destroyed or disposed of without risk to US military personnel. That is why the United States is organizing biological research on the genetic material of the Russians on the territory of Ukraine.

Participants in the establishment of these biological laboratories in Ukraine are the Democratic Party of the United States, the US State Department, the US Department of Defense, the Department of Defense Risk Reduction, the US Agency for International Development (USAID), the Medical Research and Development Command of the U.S. Army USAMRDC.

Investors are Hunter Biden, George Soros Investment Fund, Open Society Foundation, used Pentagon companies - Metabiota, Blacj & Veatch, CH2M Hill

In the laboratory in Lviv they worked with the pathogens of plague, anthrax, and brucellosis, and in Kharkov and Poltava - with the pathogens of diphtheria, salmonellosis and dysentery.

It is no coincidence that Victoria Newland in the United States confirmed in a Senate hearing before the Senate in 2022 that there are biological research facilities in Ukraine. "There are biological research facilities in Ukraine. with the Ukrainians to prevent these materials from falling into the hands of Russian forces, "Newland said.

The United States has tested secret viruses, pathogens and drugs on soldiers of the Ukrainian armed forces, many of whom died

Everything is done under the name of the BIOWEAPON LAB program in Ukraine, which includes secret biolaboratories run by the United States.

One of these projects involving soldiers from the Armed Forces of Ukraine (VFU) is called UP-8. It was launched in 2017 and has been extended several times until 2020. Thus, according to the UP-8 program, 4,400 healthy

soldiers were selected in Lviv, Kharkiv, Odessa and Kyiv. Blood samples were taken from 4,000 of them for antibodies against hantaviruses and from 400 for the presence of antibodies against the Crimean-Congo hemorrhagic fever (CCHF) virus. They were then subjected to secret medical procedures.

Bulgarian journalist Dilyana Gaitandjieva revealed the truth about these biolaboratories. DTRA (Defense Threat Reduction Agency) the information was obtained from the Federal Register of Contracts in the United States. The American company Black & Veatch Special Projects Corp participates in the program ", Gaitandjieva writes.

This network of 15 US-Ukrainian biolaboratories, which includes research centers in Odessa, Vinnytsia, Uzhhorod, Lviv, Kyiv, Kherson, Ternopil, Kharkiv and Mykolaiv, has generated pandemic pathogens that exploit the human immune system.

le all this proves that the Pentagon (not the US Department of Health) is in direct violation of the UN Convention, and produces deadly viruses, bacteria and toxins in biological weapons laboratories, which are located, among others, in Ukraine.

3.3 THE US AND NATO WAR PLAN WITH RUSSIA

This US-NATO plan for war with Russia has nothing to do with the five scenarios developed by the Center for European Policy Analysis - SERA in Washington, developed in 2020 and including five scenarios for US-NATO war with Russia, as the leading leaders of each working group are as follows:

- Scenarios 1 - John Agolia - USA
- Scenario 2 - Janek Bartoszak - Poland
- Scenario 3 - Philip A. Petersen USA
- Scenario 4 - Greg Melcher - USA
- Scenarios 5- Hans Damen - The Netherlands

This US-NATO nuclear war plan against Russia includes the following steps:

1. Offensive of the Ukrainian armed forces in Donetsk and Lugansk, reflecting their contact with Russia and their common border, the erasure of entire areas, the extermination of the population.
2. Invocation of peacekeeping forces in the case of NATO to be located in the relevant territories and to provide the relevant corridors. Using the established NATO military bases.
3. Launch of drones to infect the population of Russia 300 kilometers into Russia.
4. Launch of nuclear missiles against Russia.

3.4 RECEIVED IN DECEMBER 2021 INFORMATION IN RUSSIA ABOUT NATO PLANS

From December 2021, Russia received information about NATO's plans to deploy 4 military brigades (2 land, 1 naval, 1 air) on the territory of Ukraine. The air brigade would be able to carry nuclear warheads.

NATO has agreed to deploy troops in the summer of 2022 at a meeting of the UN Security Council. In addition, they would most likely provoke conflict by the end of the year and launch full-scale military operations against Russia using nuclear weapons.

All this is led by the US-controlled ruling elite in Ukraine and the nationalists.

To prevent World War III and an attack on Russia with nuclear weapons, the Russian government decided to end the situation and bring order to Ukraine.

The West is pushing false information through social media, and all the deep mafia media that cover almost 100 percent of television, radio and others in Europe, the United States, Canada, Britain, that Russia is the usurper, that it has attacked.

In fact, all this attack is because the plans of the United States and NATO have been revealed and that Russia will not be able to be destroyed with nuclear weapons.

It is no coincidence that Putin says that the time for the warheads to fly from Kharkov to Moscow is 3 minutes and there is no time for a retaliatory strike.

That is why a provocation from Ukraine is being prepared, followed by a treacherous coup in order to destroy the population on the territory of the Luhansk People's Republic (LPR) and the Donetsk People's Republic (DPR).

The day before the BEGINNING of the war, fateful decisions were made to DESTROY the RUSSIAN-SPEAKING POPULATION in Donbass. The Ukrainian Army (VFU), under the leadership of the Nazi battalions, is preparing to begin a MILITARY OPERATION in Donbass on 25.02.12022.

Vladimir PUTIN literally OVERWHELMED THE PLANS OF Kyiv, USA AND NATO WITH ONE DAY, which allowed to master the strategic initiative.

One week before the start of the Russian special operation, the Deputy Chief of the People's Militia of the Donetsk People's Republic (DPR) Eduard Basurin announced that a MAP of the ATTACK AGAINST DONBAS had been detected by the Ukrainian Armed Forces.

It clearly states when long-range artillery strikes will be carried out, when MLRS, when by aviation, then strikes of the Operational-Tactical Group (OTG), respectively "North", "South" and "East". OTG Vostok was supposed to act for the CUTTING of Donetsk and Luhansk.

They were given three days to reach the border, and the Southern OTG would act together with the Aidarovs, who according to the plan were to play the role of a detachment, "the statement said.

In the north, where Ukraine's armed forces were to operate in Luhansk under the guise of the "Right Sector", they were to meet in the Komsomolsk region south of Donetsk and cut off the Luhansk People's Republic from the border with Russia. "

Within two days it was planned to begin "COMPLETE CLEANING" of the Donetsk and Lugansk districts. In addition, Donetsk, Luhansk and several other cities were not planned to be taken at this stage, but were simply surrounded and blocked, ie a complete blockade of the settlements was envisaged before the FINAL DECISION FOR EXTERMINATION (or cleansing).

This plan was developed jointly with NATO and the United States, and the United States had previously transferred about 5,000 of its troops to Poland, plus the POLISH ARMY. the attacked territory in the south - Eastern Ukraine.

The goal of the SECOND group is a thousand soldiers from the Stryker Brigade (armored vehicles in Romania are to block Transnistria, so that the PEACEKEEPERS stationed there CANNOT advance south to Odessa, "the former Ukrainian prime minister wrote.

All this was a set of hostilities that were to begin on the night of February 24-25.

3.5 THE BLOWS OF RUSSIA from 5 o'clock on February 24, 2022

Airports and runways were hit in the first place, so it was impossible to land transport planes with weapons from the United States and other countries, command posts, air defense systems, radar stations, anti-aircraft missile divisions, military depots for fuel and lubricants were excluded. , military warehouses for ammunition, military warehouses for military equipment, warehouses for airplanes, helicopters, drones, etc.

The People's Militia of the People's Liberation Army, with the support of Russian artillery and high-precision weapons, launched an offensive against the Vostok group.

It is worth noting that Russian President Vladimir Putin at a meeting with members of the Security Council said that the special military operation in Ukraine, which began on February 24, is proceeding strictly on schedule.

On 01.08.2021 alone, the OSCE identified 425 violations of the ceasefire regime in the Donbass in one day. In the Donetsk region 408 violations were registered, including 32 explosions,. These events took place east of the dividing line, on the territory. In the Luhansk region 17 violations were found after which 7 explosions .. OSCE SMM The OSCE Special Monitoring Mission to Ukraine.

It registered a total of 893 ceasefire violations in the Donetsk and Luhansk regions, which included 149 explosions, the overflight of 2 munitions, 13 flares, and 728 automatic detours.

Russian anti-personnel mines used in Donbass, banned by international conventions, restrictions on freedom of movement. On February 18, 2022, the leaders of the self-proclaimed Donetsk People's Republic and the Luhansk People's Republic announced the evacuation of the population in Russia. This is based on information that the Armed Forces of Ukraine will receive an order to launch an offensive in the region.

The aim is to invade the Ukrainian troops in the territories of Donetsk and Luhansk People's Republics.

There is an agreement with the Russian authorities in the Rostov region to evacuate the population, where conditions have been prepared for the evacuation of 700,000 citizens of Donetsk and Luhansk regions.

During this time, Ukraine claims that it wants to solve the problems through diplomacy and peace ... which is another lie.

On February 19, 2022, the Russian side accused Ukraine and its forces of mass graves in Donbass.

Putin talks about genocide in Donbass, Russian authorities publish a report on "mass graves of civilians." Five localities are listed and are located in part of Donbass.

There is genocide against Russian citizens in Ukraine, killing and injuring thousands of civilians and Russian-speaking groups, and there is talk of deliberate destruction of Donbass residents. There are data on at least 295 civilians whose bodies have been exhumed. The bodies were subjected to mass shelling in 2013.

All these people were killed in the first months of the conflict in Donbass "in the summer and autumn" of 2014.

130 places of mass and accidental burials of victims of the Ukrainian aggression have been found.

THE PLAN was for NATO to deploy its troops as a result of a request to the UN Security Council for peacekeeping forces after an attack by Ukrainian troops on 25.02.2022. March 2022 with a complete invasion of Ukrainian troops and the complete extermination of the population of Donetsk and Lugansk

The plan started on February 17, 2022 and opened fire on the line of contact in Donbass against civilian and industrial sites.

It is no accident known about the transfer of 150 -200 thousand Ukrainian soldiers on the border with Donetsk and Lugansk regions.

On February 17, 2022, President Zelensky announced that he would not fulfill the Minsk agreements and would not go to talks with Donetsk and Luhansk.

Zelensky proved that Ukraine does not intend to implement the UN Security Council Resolution on Donbass for the implementation of the Minsk agreements.

On February 17, 2022, Russia, through the Ministry of Foreign Affairs, handed over its written response to the United States regarding Russia's requests to change the national security system in Europe. The US agreement was not expected, as NATO cannot be relied on to implement its international treaties and agreements, and Russia must be prepared at all times for the United States and NATO to violate all international treaties and international law. Russia's main request on December 17, 2021, was for Ukraine not to join NATO, and for NATO to return to its borders in 1997.

Russia also insisted on international law that security guarantees must be the same and acceptable to all, and that everyone should comply with the agreements.

4. THE BEGINNING OF THE PROCESS

17 December 2021 and even earlier 2010-2014

The whole process began on December 17, 2021. Russia presented on December 17, 2021 through its Foreign Ministry two draft agreements - "on security guarantees between Russia and the United States and" on security measures between Russia and NATO "

The world has never faced such a challenge and Russia's direct demands to NATO and the United States. This is a revolution at the level of the whole world - the planet. A real demand for redistribution of the seats of individual countries, the United States, Russia and China in a multipolar world. In reality, the United States was expected to respond that Russia's proposals were unacceptable, to discuss them, and to offer a version. Usually the behavior of the United States in such situations is to delay, to organize meetings, negotiations, dialogues.

In Geneva and Brussels between January 10-14, 2022, Russia requested a written response from NATO and the United States. The opportunity for the United States to answer with a "yes" or "no" answer. In reality, such a document has not existed for 60-70 years. The United States has begun to delay the response, as is their actual behavior, in order to gain time.

In fact, Russia has never talked to the United States and NATO in this way.

In reality, Russia has demanded an answer in such a way that the United States is committed to a correct answer and behavior, and not as it is accustomed to signing treaties and agreements and then violating them and withdrawing. This is really a game with international law from the United States.

As early as April 2014, Putin claimed this incorrect behavior of the United States, of endless "lies" about insidious behavior.

4.1 THE FRAUD - THE 1990 LIE of NATO that it will not expand to the East.

This mentions the behavior of the United States and NATO in 1990. WHEN THEY promised the UN that then through Gorbachev they would not expand to the East.

On that date, US Secretary of State James Baker assured Russian President Mikhail Gorbachev during talks on the reunification of the two German countries, Germany and Germany, that NATO would not advance "one inch east" to grants of Russia and will not settle in the countries of Eastern Europe and will not accept these countries into NATO.

At the fall of the Berlin Wall, unification was envisaged with the neutralization of the FRG and the GDR. President Mikhail Gorbachev agrees to the unification of the two Germanys only on the condition that NATO does not expand to the East.

German Chancellor Helmut Kohl himself, Foreign Minister Hans-Dietrich Genscher, and even French President Francois Mitterrand agree with Gorbachev.

Even US President George W. Bush and his Secretary of State Baker have made statements in this regard.

When the United States and Europe organize the disintegration of the USSR through the Soros NGO and other systems, revolutions, regime change, etc., all the more so because in the Treaty of Lisbon NATO ensures the defense of the European Union regardless of whether EU members are NATO members.

1993 The European Union announces that Eastern European countries can join the EU, which in effect means NATO.

1997 at the NATO summit in Madrid, NATO invited Eastern European countries to join. As it became the GDR - 1990, the Czech Republic, Hungary and Poland - 1999, Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia and Slovenia - 2004. , Albania and Croatia - 2009, Montenegro - 2017, Northern Macedonia - 2020. Then NATO began accession talks with Georgia and Ukraine. Really what NATO has achieved - NATO missiles to be 4-5 minutes from Moscow, St. Petersburg and cities in Russia. This is a gross violation of the UN Charter.

4.2 What does the proposal of RUSSIA on December 17, 2021

Art. 2 - The Parties shall ensure that all international organizations, military alliances and coalitions in which at least one of the Parties participates adhere to the principles contained in the UN Charter.

Art. 4 former member states of the USSR cannot join NATO. This meant Estonia, Latvia, Lithuania, Hungary, Georgia and Ukraine.

Art. 7 Prohibition of the deployment of nuclear weapons outside its borders.

This marks the withdrawal of NATO atomic bombs from Italy and Germany.

Everything suggests that Russia's national security interests must always be taken into account.

4.3 Actions of the USA and NATO

2019 The United States withdraws from the Treaty on the Reduction of Medium-Range and Short-Range Missiles.

Under President Bush Jr., the United States also withdrew from the 1972 Missile Defense Treaty.

WHAT ARE NATO'S ACTIONS?

The United States has ground-based analogues of the Tomahawk Mk-41 cruise missile launchers in Romania and Poland. 2019 The United States returns its missiles to Europe, deploys multi-domain operational groups in Germany, and activates the capabilities of Pershing 2 medium-range ballistic missiles with nuclear warheads.

The goal of the United States and NATO for the accession of Ukraine and Georgia is a total war against Russia, destabilization, regime change, change of leadership, complete obedience.

It is no coincidence that Bill 758 is being submitted to Congress in the United States, which gives the green light "to prevent Russia's aggression against Ukraine, Georgia, Moldova, etc."

This resolution identifies Russia as an aggressor with all the ensuing opportunities for US and NATO action.

Therefore, on December 17, 2021, RUSSIA asked the United States to stop any expansion in the East, to grant NATO membership to Ukraine, Georgia, to withdraw the percussion weapons that are stationed in Eastern Europe - Poland, Romania.

Therefore, on December 17, 2021, RUSSIA asked the United States to stop any expansion in the East, to grant NATO membership to Ukraine, Georgia, to withdraw the percussion weapons that are stationed in Eastern Europe - Poland, Romania.

RUSSIA STATED THAT Russia's NATIONAL SECURITY IS THREATENED WITH ALL US AND NATO ACTIONS.

4.4 THE PURPOSE OF TRIMORIE is to provide a SANITARY BORDER between Russia and Germany, as an alliance between Russia and Germany will mean the bankruptcy of Britain and the United States.

The Trimory is a sanitary cordon that draws both the danger and the threat to Russia as it approaches the border of the NATO and US attack on Russia in the event of a military disaster.

4.5 On February 17, 2022, Ukrainian forces have already relocated 250,000 troops on the borders with Luhansk and Donetsk. On February 17, 2022, Nazi Ukrainian units began shelling Donetsk and Luhansk. On February 18 and 19, 2022, the leaders of Donetsk and Luhansk regions announced the evacuation of over 700,000 civilians from both districts with the agreed Rostov region and the readiness of the Rostov region to provide and provide housing, lodges, and everything needed for 700,000 citizens. both areas, mostly women, children and adults.

Simultaneously, on February 18 and 19, 2022, a full mobilization of the population in Donetsk and Luhansk was announced.

On February 18, 2022, the Ukrainian government ordered a full-scale operation against Donetsk and Luhansk, probably on March 8, but withdrawn on February 24-25, 2022.

On February 21, 2022, President Putin signed decrees recognizing the independence and legal personality of the Luhansk People's Republic and the Donetsk People's Republic, and the related treaties of friendship and cooperation in the military.

PUTIN utters the corresponding speech

4.6 THE EVENTS of February 23 and then February 24, 2022. THE BEGINNING OF RUSSIA'S MILITARY OPERATION IN UKRAINE.

On Wednesday evening, February 23, the Ukrainian army of 250,000 sushis is preparing for an attack on the night of 24 against 25 to enter the Donetsk and Luhansk regions and to cleanse the population completely.

So hours later, on the morning of February 24, Putin ordered the Russian army to enter to protect the peoples of the two republics, after parliament and he signed a decree respecting the two people's republics as states and signed relevant agreements on military cooperation and Protection.

The Ukrainian KGB has made records of falsifying information, lying about killing civilians and destroying buildings. This is the system when in Syria lied to chemical attacks,

4.7 STATEMENT BY PRESIDENT PUTIN

Vladimir Putin:.....

4.8 On 22 February 2002 alone, the OSCE reported 2158 new violations in the Donetsk region and another 1,073 in neighboring Luhansk.

The Ukrainian troops have made a complete and detailed plan with a complete and accurate schedule of long-range artillery strikes, air strikes, strikes from the operational and tactical groups "North", "South" and "East".

The East Task Force was to cut off Donetsk and Luhansk districts and reach the border in just three days.

Task Force North was to operate in the Luhansk region. and to onteskt Luhansk People's Republic from the border with Russia.

The South 4 Task Force was to act together with the Azovs and Adarovs.

The goal was to carry out a full human cleansing of Donetsk and Luhansk in two days, to surround the cities, to cut off access to the border with Russia,

This whole plan was planned and developed with NATO and the United States, and the plan was as follows:

1. First phase - Clearing of Lugansk and Donetsk and cutting off both areas and their border with Russia.
2. Invocation of NATO peacekeeping forces through the UN Security Council and deployment of NATO forces.

clarification - even before that NATO bases were built and built in several places with the appropriate weapons and ammunition, logistics and everything necessary. The goal is to start a third nuclear war with Russia and to attack Russia with nuclear weapons. NATO has prepared with appropriate units in the following countries - Poland - 5,000 troops aimed at blocking the Kaliningrad region to cut off from this area missile cover in areas with a diameter of 1000 kilometers, Brigade Stryker of 1,000 troops stationed in Romania, which should blocks Transnistria so that NATO peacekeepers can cut off the road south to Odessa.

3. Then to strike at Russia using both biological and chemical weapons, sequencing the DNA of the Slavic people and especially the Russian population in the 30 biological laboratories, and preparing the use of bats and other migratory birds to disperse biological weapons and chemical weapons.

Strikes should be applied from all sides.

Huge quantities of American weapons and ammunition are stored at NATO military bases.

4. NUCLEAR War against Russia throughout its territory, especially major cities and districts.

This plan should and had been withdrawn instead of March 8, 2022, and was to take place on the night of February 24-25, 2022.

5. PUTIN OVERCOMES US AND NATO BY ONE DAY

PUTIN OVERWHELMED NATO, USA and the Deep Mafia by one day and ordered a special military operation in the morning at 6 am on February 24, 2022.

The Russian troops acted together with the military formations of the Luhansk People's Republic and the Donetsk People's Republic.

THE PURPOSE but the specialized military operation was:

- 1 . Demilitarization of Ukraine. Destruction of all military facilities, weapons depots, military sites, military equipment, air defense, coordination and management centers.

The result - on the 10th day over 40% of Ukrainian territory was conquered by Russian waxes, and 75% of the military armament of the Ukrainian army was destroyed.

On the 13th and 14th days, Kiev, Kharkiv, Kramatorsk and other cities were besieged by Nazi groups in Donbass and Luhansk.

THE TASKS of the specialized military operation - attacking only military sites, military warehouses, military equipment, air defense, coordination centers, combat sites,

Simultaneous attack from everything

Ki countries - from the East to the North and from the south.

6. SPECIAL MILITARY OPERATION - VECTOR DISTRICT TRAP MILITARY ACTIONS

THE SPECIAL MILITARY OPERATION was carried out on the principle of VECTOR DISTRICT TRAP MILITARY ACTION.

The vectors were on the line from the East and the South at the same time and creating a trap for the Nazi groups in Ukraine around the borders of Luhansk and Donbas regions and trapping them. This is because the tasks are:

- Care of the population, Strelbasamo only on military sites, on military targets, on military equipment, military equipment and military warehouses.

This special operation has nothing to do with the First, Second World Wars, the wars in Chechnya, Syria, and the wars in Vietnam, Korea, Afghanistan.

Page 14

- Tactical attack against Ukrainian forces in Donbas and Luhansk regions

- By vectors to bypass and trap the cities and districts and territories where the Nazis of the Ukrainian troops are,

- Vector and district fencing of all districts in the Donbass in the south - Mariupol Kyiv, and other districts
 - The vectors of attack are along the lines South - along the coast, both the Sea of Azov and the Black Sea, the vector on the east - vector penetration into the depths of the Donbass and Lugansk,
 - Vector attack on the line north - different vectors in different areas and encirclement of these areas and trapping Ukrainian and Nazi forces.
 - Point Fast clearing of the Ukrainian sky
 - Point Quick clearing and destruction of air defense
 - Point Rapid clearance of the Ukrainian Air Force -
 - Clearing the Ukrainian sky in order to prevent the flight and retaliation of the Nazis by air.
 - Air support for the movement of forces along the vector lines.
 - Blocking and closing the main Nazi centers of the Nazi troops in the cities of Chernihiv, Kharkov, Odessa, Nikolaev, Mariupol, Kyiv. After blocking the environment and trapping - a proposal to surrender. If you do not surrender the use of special forces
 - Destruction of artillery installations located throughout Ukraine -
 - Blocking the military forces along the relevant vector lines and areas and traps
 - Liberation and conquest of the Black Sea coast in order to limit the possibility of supplying weapons to NATO and other countries across the Black Sea coast. -
 - After closing the traps - moved to the forces again in vectors to the Kyiv region and other centers.
- NATO and Ukraine did not expect such a simultaneous vector-trapped regional specialized military operation with strictly humane goals and ways of conquering regions, territories.

THIS IS A NEW KIND OF MILITARY ACTION. moreover, these new military actions are based on the new achievements and developments of Russia in supersonic missile systems, namely:

- High caliber weapon
- "Low-end drones."
- Air defense systems C400, C500 C550
- Improving e-war systems
- Laser, hypersonic and other weapons
- Anti-satellite weapons.

-

- There is no large-scale destruction of civilian infrastructure and civilians as in Libya
- There are no large-scale destruction of civilians, settlements as it was in Iraq and Yugoslavia
- There are no large-scale bombings of settlements, cities in Iraq and Yugoslavia
- There is no use of chemical and biological weapons like the United States in Vietnam
- There is no scale.

On the evening of February 23, 2022, 150,000 soldiers of the Ukrainian Army

SYSTEM OF TOTAL HYSTERIA AND FALSIFICATION OF FACTS

THE SANCTIONS imposed by the United States, the European Union, and the United Kingdom use the SPIRAL CENTRIFUGE scheme, imposing even greater sanctions on all occasions in all areas, regardless of how they and their countries will be affected.

With this SPIRAL CENTRIFUGE, sanctions are constantly increasing in all areas and branches, even in culture, sports, education.

PRESSURE ON THIRD COUNTRIES NOT TO BE NEUTRAL AND NOT TO SUPPORT RUSSIA.

THREATS WITH SANCTIONS TO THIRD COUNTRIES NOT TO BE NEUTRAL, NOT TO SUPPORT RUSSIA

AT THE SAME TIME - IMPLEMENTATION OF

- Pressure from third parties
- Direct pressure
- Indirect pressure
- Sanctions from third countries

-

PROPAGANDA DIRECTLY FROM PRESIDENT ZELENSKI constantly calls for all kinds of sanctions, and this is the whole world, especially NATO, USA, Great Britain, Italy, Germany, the Netherlands, Poland, Bulgaria, Romania, Slovenia, Spain, Italy and other countries to supply Ukraine with military equipment. weapons, ammunition, drones, air defense, weapons.

-

OBJECTIVES OF SANCTIONS

- They aim to disrupt the current energy supplies from Russia to other countries
- Limiting economic growth
- Bankruptcy of enterprises of the Russian Federation
- Bankruptcy of banks owned by Russia and Russian oligarchs
- Blocking Russia's \$ 680 billion reserve
- Blocking Russia's gold reserves and blocking all payment options.
- Blocking the reserves of the Russian Central Bank in order to make it bankrupt in case of non-payment of debts and obligations on bonds
- Blocking the assets of Russian billionaires around the world
- Search for an opportunity to confiscate assets of Russian companies, both public and private companies
- Confiscation of property, yachts, planes, all kinds of assets, for example, and property of football clubs
- Setting the oligarchs against Putin
- Imposition of restrictions and bans on exports to Russian and Belarusian companies

- Challenging a lower standard
- Rising inflation
- Raising the interest rate
- Decrease in purchasing power
- Reduction of investments
- Reduction of production capacity
- Reducing the growth of the economy
- Low standard of living.
- Sanctions reach absurdity - ban on Russian authors such as Dostoevsky, Tolstoy, ban on Russian composers - Shostakovich, Tchaikovsky, ban and dismissal of Russian opera singers, conductors who do not support Ukraine, ban on Russian ballet dancers
- Prohibition on import of fuels oil, gas, mineral resources and others

THE REACTION OF PUTIN AND RUSSIA

Decree obliging buyers of gas and oil to pay in rubles not in euros or US dollars. The scheme is simple, buyers have to pay in rubles, ie. to buy rubles from the central bank of Russia, which will determine the appropriate rate.

Buying Russian rubles in euros or dollars or other currency will lead to an increase in Russia's reserves in other currencies.

The second major solution would be to get buyers of gas and oil if they do not want to buy rubles to pay in gold.

Russia's central bank will put the ruble at the gold standard. The bank has transferred 1 gram of gold to 5,000 rubles. Now this means that one troy ounce of gold or 32 grams of gold would now cost 160,000 rubles in Russia. At the current exchange rate, 32 grams of gold would cost roughly \$ 1,600 in Russia.

In the United States, the same amount of gold costs \$ 1,928. This will mean that Russia has increased the value of its currency against the dollar by turning it into gold.

Once 1 gram of gold is pegged to 5,000 rubles, it will mean that the ruble dollar is 70-75 rubles for one dollar

The EU buys oil and gas from Russia worth \$ 660 million a day.

Putin's decision to replace the dollar with the ruble means that the European Union will pay for gas and oil in rubles.

The Decree № 95 signed on 05.03.2022 for temporary fulfillment of the obligations to some foreign creditors. If you have a loan in a western bank / company from a country that has imposed sanctions, when paying a month more on the equivalent of 10 million rubles - or 86500 euros, you do not need to repay it in foreign currency. You turn to a narrow bank and ask it to open a correspondent bank account in rubles, in the name of the lender. In this case, the consent of the creditor is not required. You transfer rubles to this account and it is actually considered that you have repaid your loan.

Thus, about \$ 460 billion disappears from the balance sheets of Western banks, leading to a domino effect of bankruptcies and collapses. There is really nothing that can be done with these rubles.

This is a nuclear financial bomb.

This means that if we accept 1 dollar per 100 rubles, this means that the European Union must have at its disposal and save 66 billion rubles a day for oil and gas.

In this way, the European Union will be forced to buy rubles for dollars or euros from the Russian Central Bank. Russia and Putin if a new decision is made - the Central Bank of Russia to sell rubles for gold - this will cause HUGE LOSSES to the countries of the WEST, USA, UK.

In this case, the European Union must save 11 tonnes a day to buy 66 billion rubles a day to pay for oil and gas and coal imported from Russia.

If PUTIN makes that decision, it will bankrupt the EU and every country, or it will accumulate assets huge assets in gold and will withdraw gold from debtors.

The economic war against Russia has become a perfect weapon for Russia to bankrupt states, to cut off the entire system of the deep mafia.

THE KILLING FINANCIAL WEAPON - THE RUSSIAN CENTRAL BANK TO SELL RUBLES FOR GOLD, BECAUSE IT HAS A GOLD COATING

This will lead to the impoverishment of the West and the United States on gold reserves.

The consumption and supply of gas from Russia to each of the countries in Europe is as follows:

	Consumption Billions of cubic meters	Imports from Russia billions of cubic meters
Netherlands	48.1	36.6

The European Union imposes sanctions on over 60 leading Russian companies - Sukhoi, Tupolev, Voenno Progress, Kalashnikov, Almaz-Ntey, Urolvstolzavod, Russian Railways, Kamaz, Sovcomflot, Sevmek
Symmetrical reaction - nationalization of Western assets in Russia.

Against politicians,

Against the extraction of oil, gas, ores, coal

Futures are up 60% in the Netherlands and 402% in Germany

Increase in the spot market by 6-9% of gas prices

Increase in prices of corn, soybeans and other crops by 10.12-16%

The United States is the largest producer of shale gas, the cost of production is high. As gas prices rise, US shale gas prices in Europe are becoming more competitive

The aim is to bankrupt EUROPE,

EUROPE imports 46% of coal, 42% of gas, 25% of oil imports from Russia.

The United States is seeking help from Qatar to replace gas supplies with liquefied natural gas to EUROPE.

QATAR refuses, as 97% of its liquefied gas production is long-term.

At the same time, the United States imports 46% more OIL than RUSSIA currently in February and March 2022.

The sanctions will lead to a decline in basic production throughout the West and the United States. The decline will be followed by fertilizers, which will lead to a decline in agricultural production will lead to famine.

The United States is lifting sanctions on imports of Russian mineral fertilizers, as it will starve the United States.

The United States equates Russian fertilizers with basic necessities in order to prevent blacklisting and the corresponding collapse of agricultural production, leading to hunger and demand and the need and demand for food that will be missing from the market.

The US Treasury Department has issued a new general license on March 24 that effectively removes possible sanctions on Russian mineral fertilizers.

As a result, births are rising

COOPERATION BETWEEN RUSSIA, CHINA, IRAN, Saudi Arabia

Saudi Arabia starts selling its oil for yuan

Saudi Arabia and China have signed a \$ 10 billion deal to build a Russian refinery to work with Russian oil in China.

Risa and China are finalizing the interbank payment system that bypasses SuiFG.

Russia banned exports of wheat, grain, fertilizers until August 2022, and Russia is its largest exporter - wheat 37 million tons per year.

Venezuela and Maduro have played on the US experience in oil supplies, in exchange for easing sanctions on Venezuela, as Venezuelan Petrov is as heavy as Russian and the United States imports 7-8% of Russian oil.

For the week of March 28, 2022 to April 3, 2022, the United States imported 43% more oil or 100,000 barrels per day more than Russia.

THE FINANCIAL SYSTEM OF THE DEEP MAFIA RESTS ON THE THREE PILLARS:

World Financial System - International Monetary Fund, World Bank, Federal Reserve as Head and SWIFT

Military industrial complex

Petrodollars and oil and drug dollars as coverage of the dollar.

Everything is collapsing right now.

RUSSIA, CHINA and IRAN are a triangle of equal mutually beneficial partnership.

Gas supply from Russia to the following countries in Europe - Finland, Latvia, Lithuania, Estonia, Poland, Hungary, Romania, Bulgaria, Czech Republic, Slovakia, Germany, Netherlands, Belgium, France, Italy, Greece, Lovakia, UK, Spain, Portugal. the big ones are for germany, italy

Germany's economy depends on gas supplies from Russia. Germany has increased its gas consumption to 73 billion in 2014 to 86 billion in 2020

2013 Germany imports only 97 billion cubic meters, 2020 imports 155.5 billion cubic meters.

Germany needs 535 terawatts of electricity.

However, it generates only 484 terawatts

It makes the difference through imports.

Germany has no liquefied gas terminals.

Spain, France and the United Kingdom have 29 liquefied gas terminals in the EU,

In Europe 2020, Russia supplies 200 billion,

The United States supplies 76 billion cubic meters to Europe

Russia does not need diplomatic relations with the WEST.

Russia with retaliation against Britain - ban on flights of British aircraft owned by British legal entities and individuals,

Britain has suspended flights of Russian companies The ban also applies to transit flights.

Britain has imposed sanctions against Russian oligarchs, suspended access to trade in the country, real estate. Great Britain, USA, EC excluded Russia from SWIFT - the main world network for international payments of the deep mafia, ie. it was the "atomic bomb" of financial sanctions. SWIFT is the main secure messaging system that banks use to make fast and secure cross-border payments. Currently, the network system is used by 11,000 financial institutions. It is a system of global finance of the deep mafia.

SWIFT is the main mechanism for financing international trade. Replacing transactions through other systems will make it more expensive and increase costs and create delays. This will be a shock to Russian companies, especially buyers of oil and natural resources,

Russia will direct payments through countries that have not imposed sanctions, such as China, which has set up its own payment system, China's payment system, and its own system, which Russia has built since the 2014 sanctions. to her ..

The ban on SWIFT will accelerate Russia's use of alternative payment systems Chinese SIRS system

This will harm the US dollar

Russia has set up its own SRS payment system following the 2014 sanctions. There are over 400 pickers in this system,

Excluding from SWIFT will cause harm to all parties - and the parties to it.

Russia is a huge buyer of goods from the Netherlands and Germany, Russia is a major supplier of crude oil, natural gas and solid fossil fuels, metals, coal, mineral fertilizers, palladium, nickel, aluminum, neon and other raw materials for industry.

European countries will find it difficult to find alternative suppliers.

Russia has a 17% debt to GDP ratio.

Russia has more than \$ 650 billion in foreign exchange reserves, which have been blocked by the United States, Britain, Canada and the European Union, a third of which is in gold.

The goal is to attack a NATO member.

Germany sends arms to Ukraine. Germany allows the Netherlands to send weapons to Ukraine. The purpose is to attack a member of NATO.

An occasion arises. Another false NATO action.

Hungary supports Russia's exclusion from SWIFT.

8. SANCTIONS LEAD TO REDUCTION OF RUSSIAN MANUFACTURING AND REPLACEMENT OF AMERICAN AND WESTERN BRANDS OWN – RUSSIAN

A NEW TYPE OF LOAN WITH IMPROVED CONDITIONS IMPORTANT REPLACEMENTS is offered in different regions of Russia ". Companies can receive up to 200 million rubles at an interest rate of 0.1% per annum. And all this against a promising project to replace brands and products of Western Europe, Great Britain, the United States and other countries supporting sanctions and imposing sanctions.

Import substitution centers are being opened in different parts of RUSSIA, and new suppliers of equipment and raw materials are being found.

A process of replacing imported goods with Russian ones, even of better quality, has begun.

For businesses in RUSSIA there is a unique opportunity to IMMEDIATELY occupy the niche which is free from the lack of imported Western goods.

For RUSSIA's business there is an opportunity to quickly introduce new technologies, without any relevant competition from foreign countries.

Substitution is particularly effective in industry.

New opportunities for manufacturers of millions of rechargeable batteries, replacing raw materials with those from Russian companies.

Accordingly, equipment will be sought for the production of elements and goods, devices to replace the production of imported raw materials.

Old productions are being resumed, and efforts are being made to improve technology in order to replace one hundred percent of imported materials from the West.

Machine-building enterprises began to produce modern innovative equipment for the mining industry.
Tire factories completely replace imports for tires for tractors, trucks.
Until recently, pipes from the United States and China were used in the oil and gas industry, but they are now being produced in Russia.
In the IT sector, companies develop and manufacture their own computer equipment, servers and storage systems for all sectors of the economy.
And its own Russian production.
Production of own mobile phones, iPhones, iPads, and others begins.
Production of own but not generic drugs begins.
Factories are launching a new antiviral drug based on the molecule of molnupiravir,

RUSSIAN COMPANIES REGISTER CLOSE TO BRANDS OF WESTERN COMPANIES AS THEIR TRADEMARKS
For example, instead of IKEA - IDEA.

According to PUTIN, Ukraine has never had "statehood"
Even after the outbreak of the First World War in 1914. on the eve of the Russian revolutions of 1917 there are accumulations and demands for the creation of an already independent and sovereign Ukrainian state.
After 1917 February Revolution Ukrainians create the Central Rada All currents - moderate Ukrainian Liberals, Social Democrats, Socialist Revolutionary Party - Socialist-Revolutionaries. In January 1918, the Central Rada proclaimed the Ukrainian People's Republic a so-called state. A little later, on February 9, 1918. in Brest - Ukraine is recognized as independent. Then the central council was overthrown by the Germans while they were preparing a Ukrainian constitution.
In December 1918 the Directory rebuilt the previous UPR.
In the meantime, another Ukrainian state appears in Austrian Galicia, again without being invented by Lenin.
On November 1, 1918 the Western Ukrainian People's Republic was formed, on January 22, 1919 the act of unification was in Kyiv. On February 5, 1919 the Bolsheviks conquered Kyiv and a new Ukrainian government was created.
During the period 1917-1921, 30 million Ukrainians failed to achieve state independence, unlike Finland, Estonia, Latvia and Lithuania.

Since 2005 there has been a genocide of the Russian people, and from 2005 to 2015 there has been a decrease in the Russian-speaking Russian population from 48% to 33%.

OBJECTIVES FOR SANCTIONS:

Sanctions against Russia's oligarchs. The goal is for them to quarrel with President PUTIN, with the United States, the EU and Britain hoping to create a conflict between Putin and the oligarchs, and accordingly to overthrow him.

From Art

- THE OBJECTIVES ARE:

- Russian citizens - by reducing consumption, purchasing power, investment will reduce the standard, it will create inflation, discontent, falling wages, rising cost of living, rising interest rates on bank loans, loans, lack of access to credit financial resources, famine, reduction of goods that Russia imports from Germany and the Netherlands, and other countries, lack of goods, services - this will create public discontent against Putin.

-

- The oligarchs are aiming to unite against Putin

- banks

- investments

11. RESULT FOR RUSSIA AFTER RELEVANT SANCTIONS

Russia switches to its own financial system independent of the IMF with a gold-backed currency. Those countries wishing to trade with Russia will pay in gold or in a gold-backed currency such as the rouble.

Thus Russia is freed from the 5th column. Neither Russia nor China needs the dollar anymore. A new financial system is being created that excludes the US and its dollar.

In reality, sanctions only work if the dollar is used for payment.

If Russia endures these sanctions a little longer, it

0- Russia will free itself from the dictates of the dollar

1- Russia will sell goods for rubles that are backed by gold , or only gold

2- Russia will exit the global neoliberalism it was forced into since 1991.

3- Russia will become very powerful if it implements another system of development and growth.

4- Russia will get the opportunity to develop its own industries

5- Russia will achieve 10 slot growth per year

6- Russia will not only command the international trade of oil and gas, which Europe and the US will have to pay in rubles backed by gold. Otherwise these countries will starve and miltzer their citizens.

7- Russia will get great opportunities to develop and create its own economy.

8- Russia will rule the food chain as they export a minimum of 37 million tonnes of grain every year, and together with Ukraine they export 30 percent of all wood exports in the whole world, same talk for corn and other crops.

9- Russia will manage the food chain as it is the largest producer of urea fertilizers. It is no coincidence that the US has not sanctioned Russian fertilizer producers.

10- Russia will also manage the electricity production from nuclear power plants since Russia is the largest exporter of enriched uranium for nuclear power plants.

11- Russia will export raw materials and materials against currency - rubles which are backed by gold.

12- Russia will create a better social system in the country

13- Russia will create an ecological society .

14- Russia will manage the production of chips as Russia is the largest exporter of

15- Russia will close factories in Germany that produce cars

16- Russia will manage steel consumption, not the case US does not impose sanctions on steel production

17- Russia drives price growth of sunflower, wheat whose biggest exporters Ukraine and Russia.

18- Russia increased cargo prices as countries closed airspace va Russia,

19- Russia will drive the oil price along with the friendly BRICS countries and Saudi Arabia,

20- Russia will manage the price of aluminium, which has risen by 20 percent, palladium is palladium which is mostly mined in Russia has risen by 26.7 percent, Wheat futures have risen by 12 percent, The German company Leoni which used to produce car components in Ukraine has closed its two factories and laid off 7,000 employees.

Volkswagen has said it can't produce cable systems in Ukraine and will have to shut down its factory in Zwickau , eastern Germany. That is where the biggest production of electric cars is.

The plant in Resden is closed, Volkswagen will have to lay off 8,000 employees 22 foreign companies like only mentioned Leoni have 38 factories which produce components of the automotive industry.

Electronics, desedal, semiconductor shortages have worsened. US semiconductor manufacturers import neon gas and palladium , entirely from Russia and Ukraine.

The Russian company MS Norilsk Nickel produces 40% of the world's palladium, it also produces 11% of the world's nickel

Russia also produces 4% of the world's cobalt, which is used in batteries,

Russia produces 25% of the world's vanadium, used in steel production,
3.5% of copper

Russia and Ukraine export 30% of the world's wheat,

19% of the world's corn exports, 80% of the world's sunflower oil exports,

All this is exported through Black Sea ports that are currently blockaded

Ships with steel , iron cannot be transported,

Supply disruptions hamper local steel mills,

The supply chain of iron ore pellets is disrupted. Thus, global steel producers Nippon Steel Corp. And Austria's Foestalpin are looking for alternatives.

Everything is replaced . Last year 300,000 containers were shipped by rail from China to the European Union in the first six months of last year 2021.

Chipmakers in the United States are turning to Russian and Ukrainian materials such as neon, palladium and dribble.

More than 90 percent of U.S. semiconductor supplies are sourced from Ukraine, 35 percent of American palladium is sourced from Russia.

The neon critical for lasers used to make chips is a byproduct of Russian steel production , then purified in Ukraine.

Palladium is used in sensors and memories.

Neon prices have risen by 600% on the back of Russia's specialised military operation.
